

# MP32A

## RTU32M CPU Module

**Data Sheet**  
Doc: 40419 v1.12

## INTRODUCTION

The RTU32M series is based on an embedded 32-bit industrial platform providing flexible RTU functionality for a wide range of remote monitoring and control applications in the utility and infrastructure markets.

Each RTU32M comprises of a CPU module (MP32A), power supply module and the desired mix of IO modules and system modules, as required.

The RTU32M supports a variety of standard and open protocols such as Modbus, IEC60870, IEC61850 and DNP3. It also includes the fast event-based Binding protocol - a fast and reliable way to distribute time stamped event data between any Brodersen RTU32M in the network.

The RTU32M CPU module (MP32A) has a web server configuration interface for setup of the RTU 'personality' eg. IP address, IO range, slave address etc. Additional RTU functionality, including logic, messaging and logging are configured in the Brodersen Worksuite.

The RTU32M CPU module (MP32A) supports up to 60 I/O modules.

## POWER SUPPLY MODULE BACKPLANE PART

Description	Part Nr.
BUS module for CPU, Start	BB61A
BUS module for CPU, Middle	BB61B
BUS mod. for standby CPU (redund. setup)	BB61R

## VERSIONS / ORDERING CODES

### Hardware basic version

Order code: **MP32A Rev. A**  
**MP32A Rev. B**  
**MP32A Rev. C**

## MODULE FRONT VIEW

Figure 1: MP32A Rev. A, B & C front view

## FEATURE LIST

- Modular RTU with or without integrated I/O and communication device.
- Real Time Operating System.
- Communication Protocols include (>20 available);
  - Full Modbus suite.
  - IEC60870-5-101/103/104
  - IEC61850 Client / Server Protocol.
  - DNP3 Master and DNP3 Slave.
  - Binding - Global Distribution and Subscription of Event Based Time Stamped Variables.
- Communication Protocols can also be created as part of the logic application interface.
- Communication interfaces; 2 x Ethernet 10/100, 1x USB are featured on the CPU module.
- Full EN/IEC61131 PLC runtime – also used for special and flexible data manipulation.
- Includes power supply monitoring of the RTU32M supply voltage and temperature.
- Support for redundant power supplies and CPUs.
- Hot swappable I/O.
- Full remote management with configuration, programming and flexible distribution of all levels of software from and to RTUs on remote locations.

### CPU SPEED

The CPU module speed is managed via the RTU performance license options:

Default	200MHz
DL-528MHZ-RL	528MHz
DL-900MHZ-RL	900MHz

### RAM SIZE

Default	128MB
DL-256MB-RL	256MB

### RUNTIME

**Runtime performance:**

**Typical cycle time:** 1msec

**Scan time LB2 I/O:** 0.5msec

**I/O Detection and Configuration:**

Self-discovering I/O

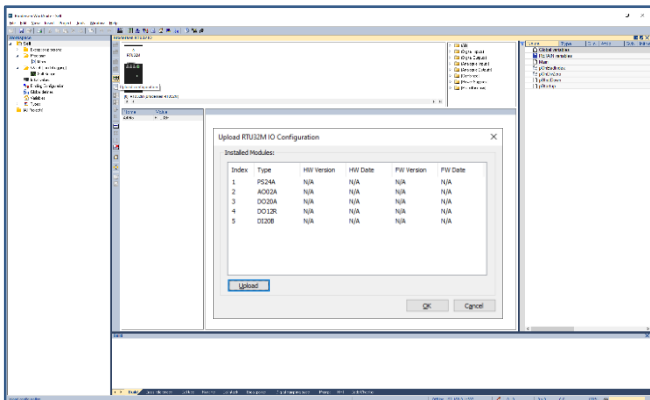

Figure 2: Self discovering I/O

Figure 3: Discovered I/O

### CPU HARDWARE

**CPU:** ARM Cortex – A7  
Freescale i.MX6, 200-900 MHz

**Memory:** RAM: 128-256MB SDRAM  
NAND Flash: 128MB  
NVRAM/FRAM: 128KB  
Micro SD Card Flash disc – removable

**RTC:** Integrated and super capacitor backed  
RealTimeClock with 1 msec resolution 10 ppm

**Interfaces:** LAN: 2x 10/100Mbps RJ45  
**MP32A Rev. A:** 1 x USB 2.0 Host.  
**MP32A Rev. B:** 1 x USB comm. with M8 connector  
**MP32A Rev. C:** 1 x serial port (RS232/RS485) with M8

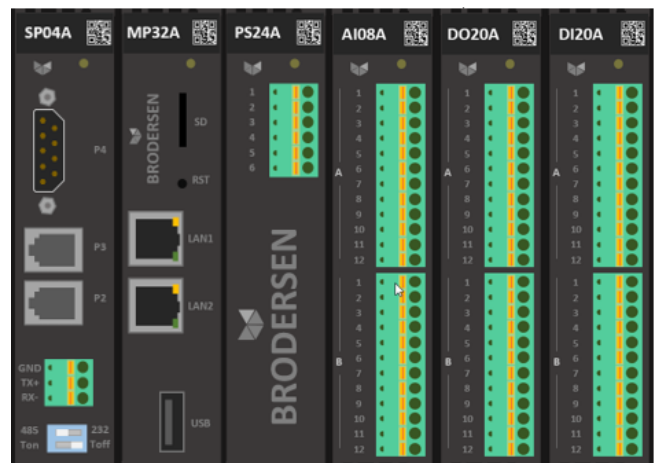

Figure 4: MP32A Rev. A hardware interface with I/O

Figure 5: MP32A Rev. B hardware interface with I/O

Figure 6: MP32A Rev. C hardware interface with I/O

### ELECTRICAL

**Power consumption (from backplane bus):**

- Current consumption: 200mA (typ.) @ 12V
- Power consumption: 2.4W (typ.)

**Separated/Safe Extra Low Voltage (SELV) limits:**

- VAC (RMS) 30V
- VAC (Peak) 42.4V
- VDC 60V

**Note:** The SELV limits relies on input supply and all connected voltages.

**MP32A Rev. B USB Port pin out:**

**MP32A Rev. C Serial Port pin out:**

### COMMUNICATION PORTS

The MP32A Rev. C serial communication provides the following communication ports:

**COM1:** Isolated RS232/RS485, configurable through web page, with M8 connector (4 Pins).

Pin No.	RS232	RS485
Pin 1	GND	GND
Pin 2	RXD	NA
Pin 3	TXD	Data -
Pin 4	NA	Data +

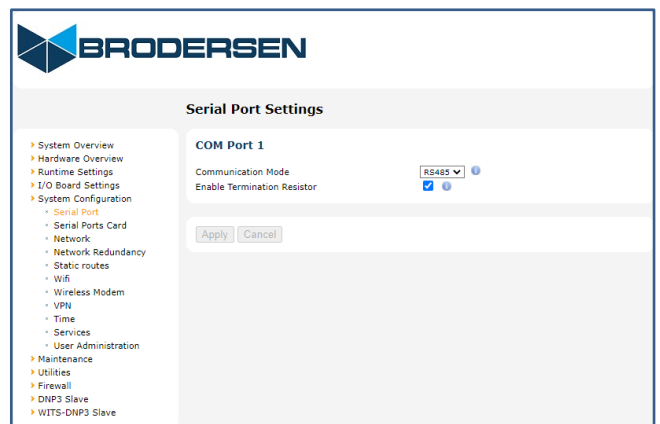

Figure 7: By default, serial port web configuration

**Note:** RTU must be rebooted from web page once the communication port is configured.

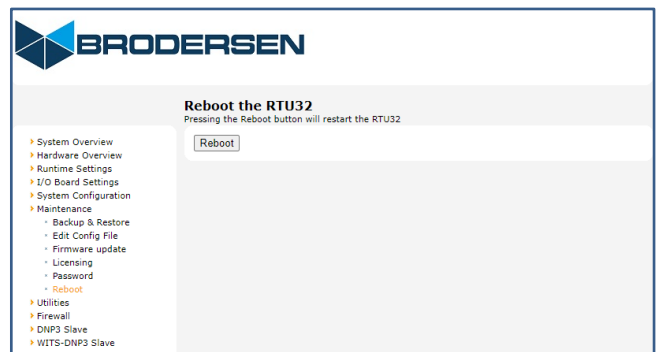

Figure 8: Rebooting RTU via webpage

## MECHANICAL

Mounting	DIN 35
Width	24 mm
Height	111.5 mm
Depth	94.5 mm
Weight	102 grams

## ENVIRONMENTAL CONDITIONS

Ambient operating temperature range	-25°C to +75°C
Ambient operating temperature range	-40°C to +85°C
Marked degree of protection	IP20
Humidity	0...99.8%
Ventilation Restrictions	No
Pollution Degree	2

## STANDARDS

### EMC:

- **IEC 61000-6-2:** EMC - Immunity standard for industrial environments
- **IEC 61000-6-4:** EMC - Emission standard for industrial environments
- **IEC 50121-4:** Railway applications - EMC - Emission and immunity of the signalling and telecommunications apparatus

### Safety:

- **IEC 60950-1:** Safety requirements for Information technology equipment
- **IEC 61010-1:** Safety requirements for electrical equipment for measurement, control, and laboratory use

### Environmental:

- **IEC 60068-2-1:** Environmental testing - Cold
- **IEC 60068-2-2:** Environmental testing - Dry heat
- **IEC 60068-2-30:** Environmental testing - Damp heat, cyclic (12 h + 12 h cycle)
- **IEC 60068-2-78:** Environmental testing - Damp heat, steady state
- **IEC 60068-2-6:** Environmental testing - Vibration (sinusoidal)
- **IEC 60068-2-27:** Environmental testing - Shock

## MODULE LED STATUS

A dual color (red/yellow) LED is provided on the module to indicate the module status. Yellow indicates the module mode / state and red indicates module error or warnings (according to the table below):

Status	Yellow	Red
Power up	OFF	ON
Logic application Start	ON	OFF
Logic application Stop	OFF	OFF
Reboot: after pressing Reset Button while powered up	ON 400ms	OFF
	OFF 400ms	
Reset Button (Rebooted)/ Power up	OFF	ON
Factory default: after pressing Reset Button during power up (restores factory default settings)	3 times ON for 500ms	OFF
	3 times OFF for 500ms	
Passive Redundancy Partner (standby)	ON 500ms OFF 500ms	OFF

## SAFETY PRECAUTIONS

- Follow the national safety regulation (IEC 61010-1) 
- Only skilled personnel are to install and operate the modules.
- Modules can only be mounted in an end-use enclosure which provides protection against fire, electrical and mechanical hazards.
- If the equipment is used in a manner not specified by the manufacturer, the protection provided by the equipment may be impaired.
